

ASTM Phase I Environmental Site Assessment Report

Abbyville
Norfolk, Massachusetts

May 4, 2020

Prepared for:

Abbyville Development, LLC & Abbyville Residential, LLC
c/o DiPlacido Development Corp.
850 Franklin Street, Suite 16
Wrentham, MA 02093

Prepared By:

Mabbett®

Mabbett & Associates, Inc.
105 Central Street, Suite 4100
Stoneham, MA 02180-1260

LIST OF ACRONYMS

AUL	Activity and Use Limitations
AST	Aboveground Storage Tanks
ASTM	American Society for Testing and Materials
EDR	Environmental Data Resources, Inc.
EPA	U.S. Environmental Protection Agency
ESA	Environmental Site Assessment
MCP	Massachusetts Contingency Plan
MassDEP	Massachusetts Department of Environmental Protection
PCB	Polychlorinated Biphenyl
pCi/L	picoCuries/Liter
RCRA	Resource Conservation and Recovery Act
RAO	Response Action Outcome
REC	Recognized Environmental Condition
SQG	Small Quantity Generator
USGS	United States Geological Survey
UST	Underground Storage Tank
VSQG	Very Small Quantity Generator

ACKNOWLEDGEMENT

This Phase I Environmental Site Assessment (ESA) Report has been prepared by Mabbett & Associates, Inc. (Mabbett®) for Abbyville Development, LLC and Abbyville Residential, LLC (collectively, Abbyville Development) for the parcels of land identified on the Town of Norfolk Assessor's Map 6, Block 2, Lots 9, 10, 12, and 14. These parcels are located in Norfolk County within the town boundary of Norfolk, Massachusetts. For the purpose of this Phase I ESA, Lots 9, 10, 12, and 14 will collectively be referred to as "the Site." This Phase I ESA was completed in accordance with, and the scope and limitations, of the American Society for Testing and Materials (ASTM) E1527-13 practice for undertaking Phase I ESAs. Use of this report, in whole or in part, at other locations, or for other purposes, may lead to inappropriate conclusions; and we do not accept any responsibility for the consequences of such use(s). Furthermore, reliance by any party not identified in the agreement, for any use, without our prior written permission, shall be at that party's sole risk, and without any liability to Mabbett.

Mabbett declares that, to the best of our professional knowledge and belief, Mabbett meets the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312, and Mabbett has the specific qualifications based on education, training, and experience to assess a *property* of its nature, history, and setting. Mabbett has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This Phase I ESA has been prepared by:

Mabbett & Associates, Inc.
David Martin
Project Geologist

This Phase I ESA has been reviewed and approved by:

Stephen A. Vetere, PE, LSP, LEP
Vice President, Environment, Engineering, and Infrastructure

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) Report presents the results of non-intrusive ESA activities for the parcels of land identified by the Town of Norfolk Assessor's Office as Map 6, Block 2, Lots 9, 10, 12, and 14. These four parcels are located in Norfolk County within the town boundary of Norfolk, Massachusetts. For the purpose of this Phase I ESA, Lots 9, 10, 12, and 14 will collectively be referred to as "the Site".

The objective in preparing this Phase I ESA for the Site is to render an opinion, to the extent practical, as to whether current or historical evidence indicates the presence of "Recognized Environmental Conditions" (RECs) as defined in the American Society for Testing and Materials (ASTM) *Standard Practice for Phase I Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). The ASTM Standard defines a REC as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of hazardous substances or petroleum products into structures, soils, groundwater, surface water, or sediments on the property. The REC term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The information generated from the Phase I ESA is intended to provide the status of current environmental conditions of the Site for the use and benefit of the Abbyville Development.

The Site reconnaissance portion of this Phase I ESA was completed on February 26, 2020 and is discussed in Section 5.0 of this report. The reconnaissance included a non-intrusive observational investigation of the existing Site conditions, visual inspections, and documentation of physical conditions of the Site. The desktop portion of this Phase I ESA included the review and interpretation of standard state and federal environmental record and database sources, a third-party environmental database review provided by Environmental Data Resources, Inc. (EDR®), and regulatory agency calls and interviews, as warranted. Our findings are not scientific certainties, but rather our professional opinions concerning the data gathered and evaluated as part of our Phase I ESA efforts at the Site. The ASTM Standard recognizes inherent limitations for Phase I ESAs as further discussed in Section 1.4 of this Report.

Mabbett has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM for Environmental Site Assessments E1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. **Based on the Phase I ESA findings, Mabbett did not identify any RECs at the Site.**

1.0 INTRODUCTION

This Phase I ESA Report presents the results of non-intrusive environmental due diligence activities associated with the four parcels of land identified by the Town of Norfolk Assessor's Office as Map 6, Block 2, Lots 9, 10, 12, and 14 (collectively, the Site). According to the Town of Norfolk Assessor's Department, both Lot 12 and Lot 14 are currently owned by S. M. Lorusso & Sons, Inc. The Site is comprised of a combined 61.2 acres of undeveloped land. A Site Locus Map showing the parcels' location and a Site Map depicting the Site and the surrounding area are provided as Figure 1-1 and Figure 1-2, respectively.

1.1 Purpose

The objective of the Phase I ESA was to render an opinion, to the extent practical, as to whether surficial or historical evidence indicated the presence of any Recognized Environmental Conditions (RECs) as defined in the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13). The ASTM Standard defines a REC as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of hazardous substances or petroleum products into structures, soils, groundwater, surface water, or sediments on the property. The term, REC, is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Phase I ESA activities at the Site were performed in substantial conformance with the scope and limitations of the ASTM E1527-13.

1.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM E1527-13, consistent with a level of care and skill ordinarily practiced by the environmental consulting professional currently providing similar services under similar circumstances. Any significant additions, deletions, or exceptions to ASTM E1527-13 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Assessment of physical setting characteristics of the Site through a review of referenced sources such as topographic maps and geologic, soils, and hydrologic reports.
- Usage of the Site, adjoining properties, and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Observations and interviews regarding current Site usage and condition including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes, and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties in, on, or at the Site.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the Site.
- Preparation of this Phase I ESA Report to present the findings of this assessment.

1.3 Significant Assumptions

During the preparation of this report, it is assumed that all reports provided to Mabbett and records maintained by government agencies and municipal offices are complete and accurate.

1.4 Limitations and Exceptions

Mabbett has prepared this Phase I ESA report using reasonable efforts to identify any potential RECs associated with hazardous substances or petroleum products in, on, or at the Site. Findings contained within this report are based on information collected from observations made on the day of the Site reconnaissance and from reasonably ascertainable information obtained from selected public agencies and other referenced sources.

The ASTM E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- **Uncertainty Not Eliminated:** A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs associated with a property.
- **Not Exhaustive:** A Phase I ESA is not an exhaustive assessment of the environmental conditions on a property.
- **Past Uses of the Property:** A Phase I ESA does not require review of standard historical sources at less than 5-year intervals. Therefore, past uses of the property may not be discovered.

Other limitations are as follows:

- The observations described in this report were made under the conditions stated herein. The conclusions presented in Section 7.0 were based solely upon the non-intrusive services described herein, and not on scientific facts or procedures beyond the scope of described services.
- In preparing this report, Mabbett has relied on certain information provided by state and local officials and other parties referenced herein, including a contracted independent data research company, and on information contained in the files of state and/or local agencies available to us at the time of the Site assessment. Mabbett assumes, and therefore relies upon, the accuracy and completeness of all information reviewed or received during this Site assessment.
- Observations made of the Site are described in this report. Where access to portions of the Site was unavailable or limited, Mabbett renders no opinion as to the presence of hazardous material or to the presence of indirect evidence relating to hazardous material in that portion of the Site.

Users of this report may refer to ASTM E1527-13 for further information regarding these and other limitations.

Mabbett makes no representation or warranty of what the past or current operations at the Site are, or have been. This report does not warrant against future operations or conditions. Regardless of the findings stated in this report, Mabbett is not responsible for consequences or conditions arising from facts not fully disclosed to Mabbett during the assessment.

Per ASTM E1527-13, *Section 6, User Responsibilities*, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of RECs associated with the Site. Failure by the User to fully comply with these specific obligations may impact their ability to use this report to help qualify for Landowner Liability Protections (LLPs) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Mabbett makes no representations or warranties regarding a User's qualification for liability protection under any federal, state, or local laws or regulations.

In accordance with the ASTM E1527-13, this report is valid for a 1-year period from the date of the report. If the report is older than 1 year, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge, and (5) environmental liens. Reports older than one year may not meet ASTM E1527-13 and therefore, the report must be updated to reflect current conditions and property-specific information. Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections of this report.

1.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, the Abbyville Development, LLC, Abbyville Residential, LLC, and any of its affiliates and third parties authorized in writing by the Abbyville Development. Any and all third parties accepting this report agree that any use or reliance thereon shall be limited by the exceptions and limitations in this report. All such third parties further acknowledge that actual site conditions may change and that hidden conditions may exist at the Site that were not discoverable within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of the Abbyville Development and Mabbett, is at the sole risk and expense of such third party.

Mabbett makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied.

2.0 **SITE DESCRIPTION**

2.1 **Location and Legal Description**

The Site is located in Norfolk County in the Town of Norfolk, Massachusetts and consists of four parcels of land identified by the Town of Norfolk Assessor's Office as Map 6, Block 2, Lot 9 (0.3 acres), Lot 10 (5.4 acres), Lot 12 (29.6 acres), and Lot 14 (31.6 acres). According to the Town of Norfolk Assessor's Department, all four parcels are currently owned by S. M. Lorusso & Sons, Inc. The Site is the former location of a gravel mining operation and is currently undeveloped land. A Site Location map illustrating the parcels' location is provided on Figure 1-1 and a Site Map depicting the Site and the surrounding areas is provided as Figure 1-2.

2.2 **Surrounding Area General Characteristics**

The Town of Norfolk covers 14.8 square miles and is located approximately 19 miles southwest of Boston. Norfolk is bordered by Medfield to the north; Walpole to the east; Wrentham to the south; and Franklin and Medway to the west.

The area immediately surrounding the Site to the north, south, and east is zoned as Residence R-3 by the Town of Norfolk. The area to the west of the Site is zoned as Rural Residential I by the Town of Franklin.

2.3 **Site Improvements**

The Site is not currently improved with any buildings or structures and, at the present time, there are no active utilities servicing the Site.

2.4 **Current Use of the Site**

The Site is currently vacant and unoccupied.

2.5 **Current Uses of Adjoining Properties**

The Site is bordered to the south by residential properties along Lawrence Street; to the west by the Norfolk/Franklin town line, beyond which lie residential properties; and to the north by undeveloped land abutting the Massachusetts Bay Transit Authority (MBTA) Commuter Rail Franklin Line railroad tracks.

The Site is bordered to the east by a parcel containing the Former Buckley & Mann Site, which is a known disposal site under the Massachusetts Contingency Plan (MCP). Below is a link to the Massachusetts Department of Environmental Protection (MassDEP) Waste Site/Reportable Release File Viewer providing access to environmental site information for the Buckley & Mann Site: <http://eeaonline.eea.state.ma.us/EEA/fileviewer/Rtn.aspx?rtn=2-3000173>

3.0 USER PROVIDED INFORMATION

This section summarizes User-provided information provided to Mabbett by Thomas W. DiPlacido, Jr., the principal of Abbyville and prospective buyer of the land comprising the Site under a purchase and sale agreement with the owner of such land. Mr. DiPlacido provided Mabbett with historical information about the Site and assisted with completion of the User Questionnaire attached to and incorporated herein as Appendix A.

3.1 Owner, Property Manager, and Occupant Information

According to the Town of Norfolk Assessor's database, the Site is owned by S. M. Lorusso & Sons, Inc. The current deed reference for Parcel No. 521 (Map 6, Block 2, Lot 12) is listed by the Norfolk Registry of Deeds in Book 10393, Page 0011, dated February 17, 1994 and the current deed reference for Parcel No. 522 (Map 6, Block 2, Lot 14) is listed in Book 05088, Page 0221, dated November 1, 1974.

There is no Property Manager or any occupants of the Site owned by S. M. Lorusso & Sons, Inc., by virtue of two deeds recorded in the Norfolk County Registry of Deeds, as follows:

- Deed dated February 17, 1994, recorded with said Norfolk Deeds in Book 10393, Page 11, and, describing Norfolk Assessors' Parcel No. 521 (Map 6, Block 2, Lot 12); and
- Deed dated November 1, 1974, recorded in Book 5088, Page 221, and describing Norfolk Assessors' Parcel No. 522 (Map 6, Block 2, Lot 14).

3.2 Title Records

Mr. DiPlacido was unaware of any deed restrictions, environmental land use restrictions, environmental liens, or activity and use limitations (AULs) on file for the Site.

3.3 Environmental Permits and/or Violations

Mr. DiPlacido was not aware of any environmental permits or violations for the Site.

3.4 Specialized Knowledge or Experience of the User

Mr. DiPlacido is familiar with the past use of the Site as an earth removal area and has previously developed a portion of the former gravel pit that is located on the Franklin side of the town line.

3.5 Significant Valuation Reduction for Environmental Issues

Mr. DiPlacido had no specialized knowledge or experience regarding a significant valuation reduction for environmental issues associated with the property.

3.6 Reason for Performing Phase I ESA

This Phase I ESA is being completed as part of an evaluation of the current Site condition in order to support a contemplated application for construction loan financing for potential redevelopment activities.

4.0 RECORDS REVIEW

Records were obtained and reviewed for the Site and surrounding properties in order to help identify possible environmental conditions affecting the Site.

4.1 Standard Environmental Records

Mabbett contracted with Environmental Data Resources, Inc. (EDR[®]) of Shelton, Connecticut, to search federal and state records databases related to the Site. This regulatory database search was performed on March 2, 2020, and in accordance with ASTM E1527-13.

Environmental record sources required by ASTM E1527-13 and identified on the EDR[®] Radius Report are listed below. The listing below may be different than what is shown in the EDR[®] Radius Map[™] Report due to address corrections made by the Preparer of this report. Other supplemental (non-ASTM) databases were included in the review as well. A copy of the EDR[®] environmental records search report is presented in Appendix B.

Summary of Environmental Database Information								
Database	Target Property	Search Distance (Miles)	<1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	>1	Total Plotted
RCRA-SQG	0	0.25	0	1	NR	NR	NR	1
RCRA-VSQG	0	0.25	0	1	NR	NR	NR	1
CERCLIS	0	0.50	1	0	1	NR	NR	2
MA SHWS	0	1.0	1	0	1	1	NR	3
MA BROWNFIELDS	0	0.50	1	0	0	NR	NR	1
INST CONTROL	0	0.50	1	0	0	NR	NR	1
MA HW GEN	0	0.25	0	3	NR	NR	NR	3
RCRA NonGen/NLR	0	0.25	1	0	NR	NR	NR	1
Totals	0	--	5	5	2	1	NR	13
NOTES: TP = Target Property (Includes Site and the Site) NR = Not Requested at this Search Distance								

4.1.1 Findings for the Site

The Site property was not listed in any of the databases searched by EDR[®].

4.1.2 Findings for Adjoining and Surrounding Properties

Six Listings were identified in federal or state record searches within the target search radii specified in the ASTM Phase I standard; however, in Mabbett's opinion, current and historical operations on these properties are not anticipated to adversely impact environmental conditions on the Site. The following sections provide a description of the listings identified in the EDR[®] Radius Map[™] Report.

Buckley & Mann, Inc.

The land now or formerly owned by Buckley & Mann, Inc. is located adjacent to the Site to the east. This property is the location of a known MCP disposal site due to a release of oil or hazardous materials (OHM) originally reported to MassDEP in 1993. The Buckley & Mann, Inc. site was reportedly closed in accordance with the MCP in 2001 with a Class A-3 Response Action Outcome (RAO), meaning that remedial actions were taken but a condition of No Significant Risk was contingent upon implementation of an Activity and Use Limitation (AUL). In 2017, MassDEP audited the AUL and issued a Notice of Noncompliance to Buckley

& Mann, Inc. citing deficiencies in the RAO documentation. The AUL was terminated in 2018 and the Buckley & Mann, Inc. property is currently in Phase II of the MCP Comprehensive Site Assessment process.

Based on the review of sampling records available on the MassDEP's Reportable Release File Viewer, historical operations at the Buckley & Mann, Inc. property resulted in the release of metals and polychlorinated biphenyls (PCBs) to sediment in the Mill River from a lagoon located in the southern portion of the property. There was no significant contamination of groundwater on the Buckley & Mann, Inc. property.

The Buckley & Mann, Inc. land is located downgradient from the Site, therefore groundwater would not be expected to impact the Site. However, Buckley & Mann, Inc. is located upstream from the Site, therefore sediment contamination from Buckley & Mann, Inc. could potentially migrate in the Mill River and come to rest adjacent to the Site. However, considering the distance between the lagoon identified as the source of sediment contamination and the Site (approximately 2,000 feet), it is unlikely that concentrations of metals or PCBs warranting any regulatory action would migrate from the Buckley & Mann, Inc. property to the Site. Therefore, the Buckley & Mann, Inc. property is not considered a threat to environmental conditions on the Site.

Revoli Construction

Revoli Construction is located at 90 Earl's Way in Franklin, Massachusetts. This property was identified in the Resource Conservation and Recovery Act (RCRA) Hazardous Waste Generator database as a Very Small Quantity Generator (VSQG), meaning that the facility is registered as a generator of RCRA hazardous waste but generates less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste, per month. This property is located upgradient from the Site, however there have been no reported releases and the use and disposal of hazardous waste does not necessarily represent a threat to the environment. Therefore, the operations on the Revoli Construction property are not expected to have an adverse impact on environmental conditions on the Site.

Howes Temco, Inc.

Howes Temco, Inc., currently Precision Engineered Products, is a machine shop located at 50 Earl's Way in Franklin, Massachusetts. This property was identified in the RCRA Hazardous Waste Generator database as a Small Quantity Generator (SQG), meaning that the facility is registered as a generator of RCRA hazardous waste and generates between 100 kg and 1,000 kg of hazardous waste per month. This facility has received notices of violation, but all appear to have been resolved to the satisfaction of the State. This property is located upgradient from the Site, but not expected to have an adverse impact on environmental conditions on the Site.

Tully Manufacturing

Tully Manufacturing is an electrical discharge machining (EDM) manufacturer located at 40 Earl's Way in Franklin, Massachusetts. This property was identified in the RCRA Hazardous Waste Generator list as a VSQG. This property is located upgradient from the Site, however there have been no reported releases and the use and disposal of hazardous waste does not necessarily represent a threat to the environment. Therefore, the operations on the Tully Manufacturing property are not expected to have an adverse impact on environmental conditions on the Site.

Camger Coatings Systems, Inc.

Camger Coating Systems, Inc. (formerly Camger Chemicals and Camger Chemical Systems) is a manufacturer of industrial coatings and adhesives located at 364 Main Street in Norfolk, Massachusetts. This property was identified in several databases including the RCRA Hazardous Waste Generator,

Underground Storage Tank (UST), and Air Facility System Data databases. This property is also the location of a known MCP release (Release Tracking Number 2-3001695) which was closed in 1996 with a Class B-1 RAO, meaning that a condition of No Significant Risk was able to be demonstrated without the need for active remedial actions. This property is located downgradient from the Site and would therefore not be expected to impact environmental conditions on the Site.

Meco Transformer

This listing represents a release of approximately 15 gallons of mineral oil dielectric fluid that occurred in 2006 from a transformer located on a utility pole on Glenwood Road in Franklin, Massachusetts. The release was closed with a Class A-1 RAO, meaning that remedial actions were able to reduce contaminant concentrations to background levels. This release is not expected to impact environmental conditions at the Site.

4.2 Physical Setting Sources

4.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Series Wrentham, Massachusetts Topographic Quadrangle Map, dated 2018, the elevation of the ground surface at the Site ranges from between 160- and 250-feet above mean sea level (MSL). Generally, the elevation in the vicinity of the Site increases from north to south and is relatively consistent from east to west. The Site topography slopes locally to the east/northeast towards the Mill River. The review of historical topographic maps provides evidence that gravel mining operations changed the topography of the Site between 1964 and 1979. The current and historical topographic maps are presented in Appendix C.

4.2.2 Wetlands

According to the EDR[®] Radius Map[™] Report and MassDEP Bureau of Waste Site Cleanup Phase I Site Assessment Map included as Appendix D, wetlands and riverfront area associated with the Mill River are present on the northern portion of the Site. According to the MassDEP Phase I Site Assessment Map, certified vernal pools are mapped on the Site.

4.2.3 Geology

According to the USGS National Geologic Map Database, bedrock in the general area of the Site is characterized as belonging to the Dedham Granodiorite (Precambrian Z) Formation of the Precambrian Geologic Period with major lithologic components consisting of light to dark-gray to pink, medium to very coarse grained granite and granodiorite.

The EDR[®] Radius Map[™] Report describes bedrock in the vicinity of the Site as being Z granitic rocks of the Precambrian system from the Precambrian Geologic Era. Bedrock outcrops were not confirmed to be present on the Site.

4.2.4 Groundwater

According to the EDR[®] Radius Map[™] Report, groundwater at the Site is anticipated to follow the topography and flow east/northeast towards the Mill River. Review of environmental reports prepared for the Former Buckley & Mann Site (located to the east of the Site) indicates the primary direction of groundwater flow on the adjacent property is toward the east and northeast, with groundwater discharging to the Mill River. The actual groundwater flow direction underlying the Site may vary depending on soil characteristics and the nature of the geologic strata.

According to the MassDEP Bureau of Waste Site Cleanup Phase I Site Assessment Map, the Site is located within a Zone II wellhead protection area, which is the portion of an aquifer which contributes to a drinking water well under the most severe pumping and recharge conditions that can be realistically anticipated.

4.2.5 Flood Zone

According to the EDR[®] Radius Map[™] Report and MassDEP Bureau of Waste Site Cleanup Phase I Site Assessment Map, a portion of the Site is located within a 100-year flood zone.

4.2.6 Soils

According to the EDR[®] Radius Map[™] Report, soil components of Scarborough, Hinckley, Pits, Swansea, and Windsor were listed in the vicinity of the Site. The primary hydraulic component in the vicinity of the Site consists of Hydraulic Group Class A, which are well-drained to excessively-drained sands and gravels with high infiltration rates. Hydraulic Group Class D is also present in the areas surrounding the Mill River. These soils are classified as having a very slow infiltration rate with a mucky fine sandy loam texture, clayey, and having a high water table.

4.2.7 Public Water Supply Wells

According to the EDR[®] Radius Map[™] Report, one public water supply well is located within one mile of the subject property. The referenced well is maintained by the Town of Franklin Water Division and reportedly has the capability to serve 10,001-50,000 persons. Based on available groundwater flow direction information, this well is most likely located upgradient/crossgradient to the Site.

4.3 Historical Records Sources

The following sections provide a summary of the review of historical aerial photographs, topographic maps, city directories, Sanborn Fire Insurance Maps, and other municipal records reviewed by Mabbett during completion of the Phase I ESA.

4.3.1 Aerial Photographs

Mabbett reviewed available aerial photographs of the Site and surrounding area provided by EDR[®]. Aerial photographs included the years 1952, 1961, 1970, 1975, 1985, 1995, 2008, 2012, and 2016. These photographs are provided in Appendix C.

Based on the aerial imagery reviewed, from 1952 to 1970 the Site does not appear to be developed. The aerial photograph from 1970 shows land clearing to the west of the Site, suggesting that gravel mining operations had commenced on the adjacent property. In the 1975 aerial photograph, gravel mining operations appear to have extended onto the southern portion of the Site. The limits of gravel mining appear to remain consistent, limited to the southern half of the site, in photographs taken through the early 2000s. More recent photographs show increasing vegetation coverage, suggesting gravel mining operations ceased at some time during the 2000s.

The review of historical aerial photographs did not identify any other site activities or uses beside the gravel mining operation. The review of aerial photographs did not definitively identify past uses indicating RECs in, on, or at the Site or surrounding area.

4.3.2 Historical USGS Topographic Maps

Historical USGS topographic maps provided by EDR were available for the Site and the surrounding area for the years 1889, 1893, 1915, 1919, 1940, 1943, 1945, 1946, 1947, 1964, 1979, 1985, 1987, and 2012. These maps are included in Appendix C. No indication of development is evident on the topographic maps from 1889 to 1964. It is not until the 1979 map that development labeled as "Gravel Pit" is identified on

the Site. “Gravel Pits” are identified on the 1985 and 1987 topographic maps but not on the 2012 map. The next available topographic map from 2012 does not indicate any further gravel mining operation. The review of historical USGS topographic maps did not definitively identify past uses indicating RECs in, on, or at the Site or surrounding area.

4.3.3 Historical City Directories

Historical City Directories for the Site from the years 1984, 1988, 1992, 1995, 2000, 2005, 2010, and 2014 were provided by EDR and reviewed by Mabbett. A copy of the City Directory search is provided in Appendix C. The Site was not listed in any of the historical directories provided for review. The review of Historical City Directories did not definitively identify past uses indicating RECs on the Site.

4.3.4 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were not available for the Site. Mabbett considers this to be an insignificant data gap based on the other information reviewed for the Site. A copy of the Certified Sanborn Map Report is provided in Appendix C.

4.3.5 State and Municipal Records

Mabbett performed a Site visit on March 9, 2020 that included a visit to the Norfolk Town Hall and other pertinent Town offices. Mabbett contacted the following agencies to obtain current and historical environmentally pertinent information associated with the Site:

Norfolk Town Offices: Building Department, Assessors Office, Board of Health, Conservation Commission, and Public Works Department. No records of permitting or inspections were found to indicate any potential environmental condition exists, or has existed, at the Site.

Norfolk Fire Department: The Norfolk Fire Department reported that there have been no hazardous calls to the subject property or any documentation of underground storage tanks or aboveground storage tanks in existence at the Site.

Massachusetts Department of Environmental Protection: The MassDEP did not have any reported releases associated with the property and showed no registered ASTs or USTs for the property.

5.0 SITE RECONNAISSANCE

5.1 Methodology

On February 26, 2020, a Mabbett environmental professional performed a reconnaissance of the Site and surrounding areas. The site reconnaissance efforts consisted of a walk-through of the Site property noting environmental conditions therein. Weather conditions during the time of Site reconnaissance were noted as cloudy with temperatures in the 40s and did not interfere with the observation of Site conditions. Representative photographs taken during the Site reconnaissance are provided in Appendix E.

5.2 Site Observations

The Site was confirmed as undeveloped, vacant property. Dirt roads utilized during historical gravel mining operations were noted, but gravel mining areas were vegetated with trees and shrubs. Surrounding properties are developed for residential use or undeveloped land used for passive recreation.

5.3 Underground Storage Tanks

No evidence of USTs was observed at the Site during the site reconnaissance.

5.4 Aboveground Storage Tanks

No evidence of ASTs was observed at the Site during the site reconnaissance.

5.5 Hazardous Substance Use, Storage, and Disposal

No evidence of hazardous substance use, storage, or disposal was observed during the site reconnaissance.

5.6 Ozone Depleting Substances

No equipment possibly containing Ozone Depleting Substances (ODS) was observed during the site reconnaissance.

5.7 Non-Hazardous Solid Wastes and Disposal

Solid waste is not currently generated at the Site.

5.8 Polychlorinated Biphenyls

No indication of PCB storage or use was noted during the Site reconnaissance.

5.9 Stained Surfaces and Distressed Vegetation

Mabbett did not observe any notable surface stains or distressed vegetation around the Site.

5.10 Underground Structures

Evidence of any unusual underground structures was not observed during Site reconnaissance.

6.0 OTHER ENVIRONMENTAL CONDITIONS

6.1 **Radon**

Radon is a naturally occurring, colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries/Liter (pCi/L) of air. The guidance action level is not a regulatory requirement for private owners of commercial real estate but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Mabbett's review of published radon data compiled by EDR[®] (using federal and state agency sources) revealed that the property is located in EPA Radon Zone 2.0, an area with predicted average indoor radon screening levels greater than 2.0 pCi/L and less than 4.0 pCi/L.

6.2 **Additional User Requested Services**

No additional User requested services were included in the scope of work for this Phase I ESA.

7.0 CONCLUSIONS

Based on the Phase I ESA including the site reconnaissance, database search, historical records review, interviews, and information provided by persons familiar with historical site operations, the following is a summary of findings at the Site:

- Historical Gravel Mining Operations: Based on the review of available historical information and persons familiar with historical site operations, the Site was historically developed as a gravel pit. Gravel mining operations appear to have commenced in the 1960s and continued into the 1990s. Since the cessation of gravel mining operations in the 1990s, the Site has been allowed to become overgrown, which is its current status. No evidence exists to suggest that a release of hazardous substances or petroleum products associated with gravel pit operations has occurred, therefore it is not considered a REC.
- Release on Adjacent Property: The Site is located adjacent to real property owned by Buckley & Mann, Inc. (B&M Property). The B&M Property contains a known release that has not achieved compliance with the MCP. The release on the B&M Property is located downgradient from the Site, therefore if there was any groundwater contamination it would not be expected to impact groundwater at the Site. Furthermore, the release on the B&M Property is located approximately 2,000 feet from the Site, therefore it is unlikely that concentrations of contaminants requiring any regulatory action would migrate from the B&M Property to the Site. In conclusion, the presence of releases at the B&M Property does not represent a REC for the Site.

Mabbett has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM for Environmental Site Assessments E1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. **Based on the Phase I ESA findings, Mabbett did not identify any RECs at the Site.**

APPENDIX A
USER QUESTIONNAIRE

ASTM E1527-13 USER QUESTIONNAIRE

When the "user" (the party for whom the assessment is being prepared) of the Phase I is required to help the environmental professional identify recognized environmental conditions at the property, a "User Questionnaire" is completed by the user to help gather information that may identify recognized environmental conditions at the property.

We ask that you answer the six questions below to the best of your knowledge. We understand that, in some circumstances, you may have little or no information. Still, we encourage you to complete and return the questionnaire as soon as possible. This will allow us to reflect the fact that the Questionnaire was completed when we issue our report as is required. Completion of the assessment to the new standard, when conducted in connection with the asset purchase of a real property, may entitle the user to certain federal liability protections that result from conducting "All Appropriate Inquiries" into the previous ownership and uses of a property.

On the second page of this form is a list of documentation. The E1527-13 Standard requires that the User will ensure that the consultant is made aware that any of these materials exist for a site, and if so, that these documents be provided for the consultant's review. Please indicate whether any of these documents are available, and ensure that Mabbett & Associates will either receive copies or be provided an opportunity to review the relevant materials.

We appreciate your assistance. If you have any questions, feel free to contact us.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? **I AM NOT AWARE OF ANY CLEAN-UP LIENS OR ANYTHING FILED AGAINST THE PROPERTY**
2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? **I AM NOT AWARE OF ANY (AULS) OR ANYTHING ELSE THAT RESTRICTS ENVIRONMENTAL CONTROLS OR LAND USE.**
3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? **THERE WAS NEVER ANY CHEMICAL OR PROCESSES ON SITE, I AM FAMILIAR WITH ITS PAST USE AS AN EARTH REMOVAL AREA AND DEVELOPED A PORTION OF THE PROPERTY IN FRANCIS.**
4. Does the purchase price/loan amount for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? **NO CONTAMINATION THAT I AM AWARE OF & NO DISCOUNT ON THE PURCHASE PRICE. IT IS FAIR MARKET VALUE**
5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property? **I AM ONLY AWARE OF ITS PAST USE AS AN EARTH REMOVAL OPERATION.**
6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? **NONE THAT I AM AWARE OF OR NEED TO NOTE.**

ASTM E1527-13 USER QUESTIONNAIRE

As part of this study, which of the following are you providing?

- 1. Previous environmental site assessment reports Yes No
- 2. Environmental compliance audit reports Yes No
- 3. Environmental permits (including but not limited to solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits) Yes No
- 4. Registrations for underground and aboveground storage tanks Yes No
- 5. Registrations for underground injection systems Yes No
- 6. Material safety data sheets Yes No
- 7. Community Right-to-Know plan Yes No
- 8. Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. Yes No
- 9. Reports regarding hydrogeologic conditions on the property or surrounding area Yes No
- 10. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property Yes No
- 11. Hazardous waste generator notices or reports Yes No
- 12. Geotechnical studies Yes No
- 13. Risk assessments Yes No
- 14. Recorded Activity and Use Limitations (AULs). Yes No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/30/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

State and tribal Brownfields sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there is 1 MA BROWNFIELDS site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

MA HW GEN: Permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified MassDEP of their hazardous waste activities.

A review of the MA HW GEN list, as provided by EDR, and dated 11/25/2019 has revealed that there are 3 MA HW GEN sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (888) 372-7341
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 02/27/2020
Number of Days to Update: 4	Next Scheduled EDR Contact: 04/06/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (888) 372-7341
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 02/27/2020
Number of Days to Update: 4	Next Scheduled EDR Contact: 04/06/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (888) 372-7341
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 02/27/2020
Number of Days to Update: 4	Next Scheduled EDR Contact: 04/06/2020
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (888) 372-7341

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/04/2019	Source: Department of the Navy
Date Data Arrived at EDR: 11/13/2019	Telephone: 843-820-7326
Date Made Active in Reports: 01/28/2020	Last EDR Contact: 02/10/2020
Number of Days to Update: 76	Next Scheduled EDR Contact: 05/25/2020
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/22/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/22/2019	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2020	Last EDR Contact: 02/20/2020
Number of Days to Update: 67	Next Scheduled EDR Contact: 06/08/2020
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/22/2019	Source: Environmental Protection Agency

State and tribal Brownfields sites

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 12/05/2019	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

USGS TOPOGRAPHIC MAP

Target Property Map:	5645768 WRENTHAM, MA
Version Date:	2012
Southwest Map:	5646203 FRANKLIN, MA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

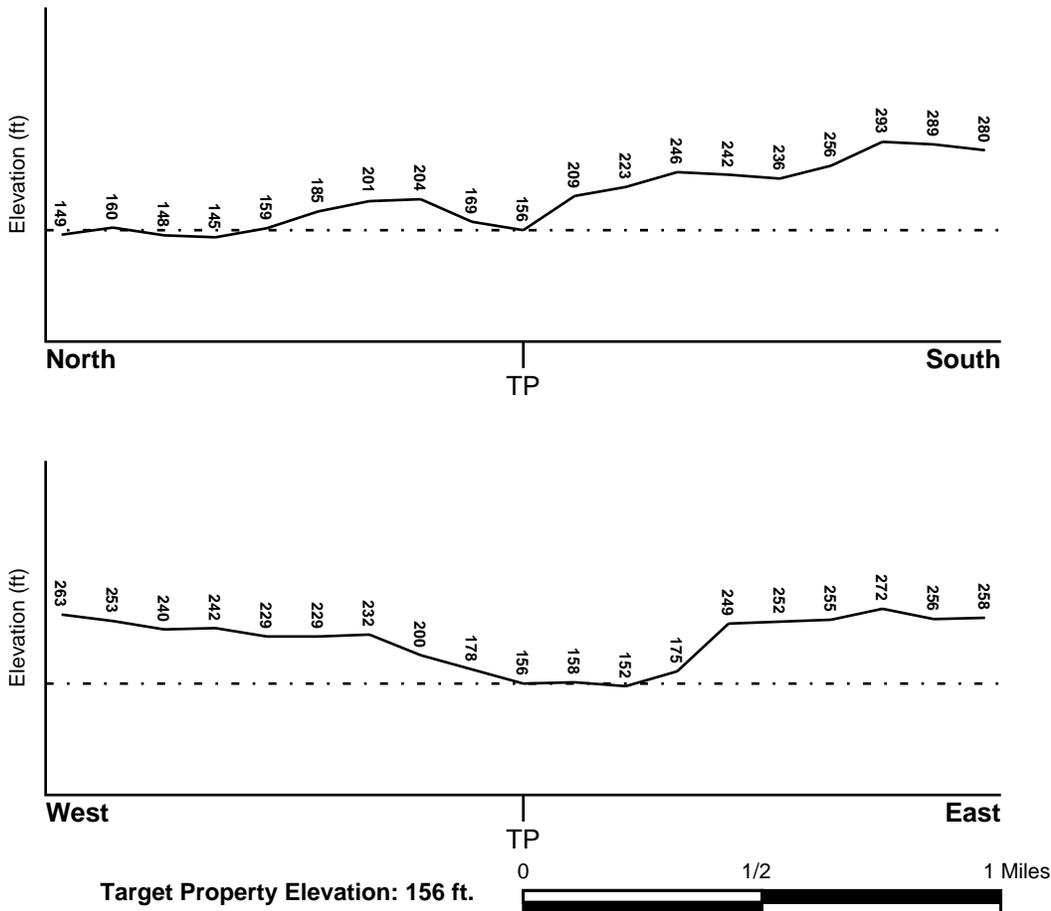

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
25021C0321E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
25021C0307E	FEMA FIRM Flood data
25021C0322E	FEMA FIRM Flood data
25021C0309E	FEMA FIRM Flood data
25021C0323E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WRENTHAM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Scarborough

Soil Surface Texture: mucky fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	mucky fine sandy loam	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 4.5
2	9 inches	59 inches	sr to loamy fine sand to gravelly coarse sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Hinckley

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6
2	9 inches	14 inches	gravelly loamy sand	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6
3	14 inches	59 inches	sr to very gravelly loamy fine sand to cobbly coarse sand	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6

Soil Map ID: 3

Soil Component Name: Pits

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Swansea

Soil Surface Texture: mucky peat

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

Soil Map ID: 5

Soil Component Name: Hinckley

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6
2	9 inches	14 inches	gravelly loamy sand	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
3	14 inches	59 inches	sr to very gravelly loamy fine sand to cobbly coarse sand	Not reported	Not reported	Max: 705 Min: 141.14	Max: 6 Min: 3.6

Soil Map ID: 6

Soil Component Name: Windsor

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	loamy fine sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5
2	3 inches	18 inches	loamy sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5
3	18 inches	59 inches	sand	Not reported	Not reported	Max: 141.14 Min: 42.34	Max: 6.5 Min: 4.5

Soil Map ID: 7

Soil Component Name: Sudbury

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Not reported	Not reported	Max: 141.14 Min: 14.11	Max: 6 Min: 3.6
2	11 inches	22 inches	sandy loam	Not reported	Not reported	Max: 141.14 Min: 14.11	Max: 6 Min: 3.6
3	22 inches	59 inches	gravelly coarse sand	Not reported	Not reported	Max: 141.14 Min: 14.11	Max: 6 Min: 3.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: MassDEP

Telephone: 617-292-5907

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Telephone:

Public Water Supply Database

Telephone:

The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:

The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:

The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:

MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:

Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

DEP Approved Zone IIs

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Mabbett & Assoc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

03/02/20

Site Name:

The Preserve At Abbyville
LAWRENCE ST
NORFOLK, MA 02056
EDR Inquiry # 5991908.3

Client Name:

Mabbett & Assoc.
5 Alfred Circle
Bedford, MA 01730
Contact: David Martin

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Mabbett & Assoc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8516-4BB0-A093
PO # 2018016.005.001
Project The Preserve at Abbyville

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8516-4BB0-A093

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Mabbett & Assoc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.
