

**Norfolk Road Safety Committee  
1 Liberty Lane  
Norfolk, Massachusetts 02056**

Minutes from **December 1st 2004** RSC Meeting - Joe Sebastiano, Jim Leonard, Bill Crump, Butch Vito

- Discussed packaging the sidewalk presentation some more with Butch's support, with improved mapping for Spring Town Meeting Presentation - confirming the first few years priority segments. We should also prepare/provide as best we can clear favorable resident support. Joe will be asking that a Selectmen/liaison more regularly join our monthly meetings, especially in prep of the upcoming Spring Town Meeting...would like this to happen starting in January if possible.
- The new stabilization fund for sidewalks would begin with available funds already secured via planning board arranged developer funds (obtained in place of laying new sidewalks on both sides - lying on only one side - of any new development/sub-division roads). Karen from the Highway Dept will compile the current totals and provide an update to us in December...200K+/-? available. Bill plans to contact/e-mail Bob Markel regarding questions we have and clarifications Bob may be able to provide us about the Stabilization Funding process.
- We discussed that there was also a public hearing scheduled for Tuesday, December 14, 2004, 7:00 p.m., at the McBride Auditorium, Freeman Centennial School regarding the Route 115 reconstruction project...that many of us should try to attend in support of.
- Butch estimates we can ask for 20 more streetlights, the committee will continue to refined a top 20 list...Butch needs this ASAP.
